

Trichlorethylene 0.25 - 50 ppm

Order-No. 86 10 320

CAUTION

These instructions for use describe the application scope for Dräger MicroTubes. Any use in combination with the Dräger X-act 7000 requires precise knowledge and observance of the instructions for use of the Dräger X-act 7000.

Use Dräger MicroTubes only in connection with the Dräger X-act 7000.

Store Dräger MicroTubes in their packaging protected from light and dirt (e.g. dust, water).

Scope

To determine the presence of trichlorethylene in air.

Measuring range: 0.25 to 50 ppm

Typical measuring time: 20 to 270 s

Temperature: 0 to 40 °C

Correction: <20 °C: +5.5 % from the measured value per °C
>25 °C: -3.5 % from the measured value per °C

Humidity: 1 to 40 mg/L

Accuracy: ±25 % (under calibration conditions)
